

## ARTICLES BY TITLE

INDEX TO VOLUME 46

JANUARY THROUGH DECEMBER, 1973

Acknowledgement	297
A curious property of the integer 38	Erwin Just and Norman Schaumberger 221
Almost perfect numbers	R. P. Jerrard and Nicholas Temperley 84
Analytic functions on nonopen sets	C. D. Minda 223
An apparently algebraic property of the integers	W. P. Berlinghoff 211
An "elephantine" equation	S. Naranan 276
An inequality for elliptic and hyperbolic segments	Michael Golomb and Hiroshi Haruki 152
An isoperimetric problem on a lattice	D. E. Daykin 217
Announcement of Lester R. Ford Awards	H. L. Alder 229
A note on Chebyshev's theorem	A. A. Gioia 95
A note on conjugate spaces	Gilbert Steiner and Richard Bronson 158
A note on matrix inversion	A. Polier Geist 226
Another proof of a theorem of Niven	K. S. Williams 39
Another simple solution of the butterfly problem	S. R. Conrad 278
A principal ideal ring that is not a Euclidean ring	J. C. Wilson 34
A simple construction of a non-Desarguesian plane	S. C. Saxena 225
Beginning statistics at the track	W. P. Cooke 250
CEM and the MAA film projects advisory committee	102
Characterizing motions by unit distance invariance	R. L. Bishop 148
Class notes on series related to the harmonic series	M. S. Demos 40
Complements to an inversion formula	D. V. Widder 1
Constructing a third order magic square	C. W. Trigg 99
Covering sets of congruences	Martin Billik and H. M. Edgar 265
Duality in spherical triangles	M. S. Klamkin 208
Egyptian fraction expansions	Robert Cohen 76
Finite groups acting on sets with applications	L. W. Shapiro 136
Finite sets	Jean E. Rubin 183
Glossary	Katharine O'Brien 38
If $n$ lines in the Euclidean plane meet in 2 points then they meet in at least $n-1$ points	Frank Pavlick 221
Infinitesimals and integration	A. H. Lightstone 20
Integer polynomials with prescribed integer values	Charles Small 92
Minimal covers for closed curves	G. D. Chakerian and M. S. Klamkin 55
Minimum triangles inscribed in a convex curve	G. D. Chakerian and M. S. Klamkin 256
Norm preserving operators on decomposable tensors	Richard Bronson 100
Notes and comments	160
Notes and comments	226
Notes and comments	282
Number of solutions of the congruence $x^m \equiv r \pmod{n}$	James Alonso 215
On number theoretic functions which satisfy $f(x+y) = f(f(x) + f(y))$	J. N. Simone 213
On palindromes	Heiko Harborth 96
On representing an integer as the harmonic mean of integers	S. W. Golomb 241
Perfect square patterns in the Pascal triangle	Zalman Usiskin 203
Polygons in arrangements generated by $n$ points	Branko Grünbaum 113

## BOOK REVIEWS

EDITED BY ADA PELUSO, Hunter College of CUNY and WILLIAM WOOTON, Lake San Marcos, California

Names of authors are in ordinary type; those of reviewers in capitals and small capitals.

- Eves, H. W. *In Mathematical Circles, Quadrants I and II; In Mathematical Circles, Quadrants III and IV; Mathematical Circles Revisited; Mathematical Circles Squared*, J. E. YARNELLE, 163  
 Hall, J. F. *Trigonometry: Circular Functions and Their Applications*, JAMES HARDESTY, 227  
 Kapur, J. N. *The Fascinating World of Mathematics*, TERRAL MCKELLIPS, 228  
 Kline, Morris. *Mathematical Thought from Ancient to Modern Times*, HARRY POLLARD, 282  
 ———, *Why Johnny Can't Add: The Failure of the New Math*, JOHN NIMAN, 228  
 Pollard, Harry. *Applied Mathematics: An Introduction*, N. D. KAZARINOFF, 164

## PROBLEMS AND SOLUTIONS

EDITED BY ROBERT E. HORTON, Los Angeles Valley College

## PROPOSALS
